

// Bring it all together seamlessly

Maximize the returns from your subsea assets

Subsea Services Alliance unifies surface, subsea, and subsurface capabilities to deliver the most high-performing subsea intervention and decommissioning solutions in the industry. This state-of-the-art approach maximizes economic recovery while lowering costs.

Shared risk. Greater rewards.

Combining the complementary strengths in technology and service of Schlumberger and Helix Energy Solutions Group, Subsea Services Alliance opens up new possibilities that deliver efficiencies and enhance the value of your subsea assets without compromising safety or performance.

Through our reservoir-driven approach and early proactive customer engagement, we work with you to develop economically viable solutions that share risks and rewards by implementing innovative commercial models and performance-based contracts.

Synchronized services

Our experience, capabilities, and global footprint provide everything you need to enhance subsea production, extend productive life, access and intervene efficiently, and optimize decommissioning—anywhere in the world.

Surface—Dedicated to intervention

An unmatched fleet of 7 dedicated, custom-designed subsea well intervention vessels, supported by 50+ ROVs, is strategically located across the world.

Subsea—Efficient access to any well

Innovative riser-based, riserless, and specialized subsea well access and control systems enable efficient access to any subsea well worldwide.

Subsurface—Right tools for every job

A comprehensive portfolio of subsea reservoir performance services that leverage cutting-edge, live-data-driven, and powered technologies and production chemistry maximizes returns from subsea assets.
