

SURFACE // SUBSEA // SUBSURFACE

// **Bring it all together
seamlessly**

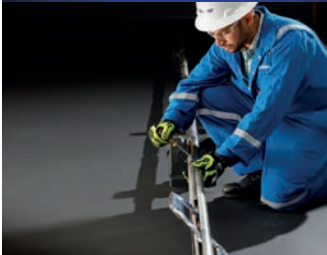

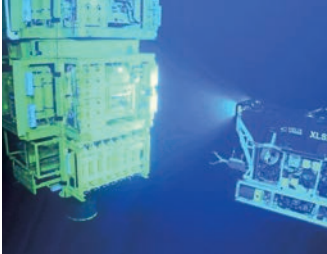

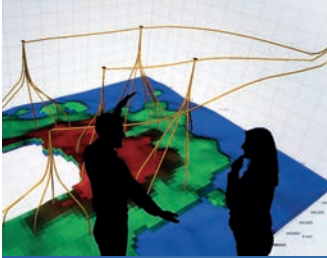

Maximize the returns from your subsea assets

The Subsea Services Alliance combines surface, subsea, and subsurface capabilities to deliver integrated subsea intervention and decommissioning solutions that maximize economic recovery and lower costs.

Shared risk. Greater rewards.

Combining the collective strengths and capabilities of Schlumberger and Helix Energy Solutions Group, the Subsea Services Alliance opens new possibilities, drives efficiencies, and enhances value without compromising safety or performance.

Through our reservoir-driven approach and early proactive customer engagement, we develop economically viable solutions that share risks and rewards through innovative commercial models and performance-based contracts.

Synchronized subsea services

Our experience, capabilities, and global footprint provide support to efficiently enhance subsea production, extend productive life, access and intervene efficiently, and optimize decommissioning anywhere in the world.

Surface—Dedicated to intervention

An unmatched fleet of 7 dedicated, custom-designed subsea well intervention vessels strategically located around the world. Supported by 50+ ROVs.

Riserless	Riser-based

Subsea—Efficient access to any well

Innovative riser-based, riserless, and specialized subsea well access and control systems enable efficient access to any subsea well worldwide.

Subsurface—Right tools for every job

A comprehensive portfolio of subsea reservoir performance services that leverage cutting-edge, live-data-driven, and powered technologies and production chemistry to maximize returns from subsea assets.
